## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/8/03 has been entered.

### *Response to Arguments*

2. Applicant's arguments filed 12/8/03 have been fully considered but they are not persuasive.

Applicant alleges that the test for 35 U.S. C. 101 has not been met since U.S. Patent No. 6,306,687 fails to disclose **adhesively attaching the segment of tape to portions of the lead frame, the segment of tape extending across the opening having a thermosetting adhesive located thereon forming an attachment location for the semiconductor device, attaching the semiconductor device to at least a portion of the segment of tape at the attachment location for the semiconductor device using the thermosetting adhesive located on a portion of the segment of tape, the semiconductor device having a portion thereof located within the opening formed by the plurality of lead fingers of the lead frame, and attaching at least two tape segments to portions of the lead frame, the at least two tape**

Art Unit: 2827

**segments being spaced to define at least one opening between the at least two tape segments providing an attachment location for the semiconductor device therein, said at least two tape segments shaped for extending across the opening forming the attachment surface of the semiconductor device.** This is deemed to be unpersuasive because the above limitations are all inherent in U.S. Patent No. 6,306,687.

### ***Double Patenting***

3. This rejection is based on double patenting of the "same invention" type find its support in the language of 35 U.S.C. 101, which states, "whoever invents or discovers any new and useful process ... may obtain a patent therefor " (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

4. Claims 1-20 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 and 10 of prior U.S. Patent No. 6,306,687. This is a double patenting rejection.

The prior art made of record and not relied upon is cited primarily to show the process of the instant invention.
